GNP Mission Statement

We are committed to building positive, long lasting relationships in the community in which we operate through open and honest communication.

To accomplish this goal we will:

• Educate the public in our business
• Keep interested parties apprised of our operations
• Provide outreach to those affected by our presence
• Participate in community activities
• Make contributions to local organizations in order to support the communities in which we operate
Health, Safety and the Environment
Health, Safety and the Environment

- Safety First!!
- Reduce Environmental Impact
- Protection of Groundwater Aquifers
- Responsible Road Use
Reducing Environmental Impact

- **Site Development**
  - Multi-well pads
  - Erosion and Sedimentation Plans
- **Water Transportation/Trucking**
  - Use of fresh water pits on site
  - Transporting water through pipelines from site to site
- **Recycling Water**
  - Recycling flowback for use in future frac operations
Reducing Environmental Impact: Erosion and Sedimentation Plans

- Plan from the start for reclaiming the site
- Best Management Practices
  - Silt fences, hay bales, rock construction entrances
  - Clean and well-laid out sites
- Site construction
  - Strip and stockpile soil
  - Cut and fill practices
- Site reclamation
  - Reclaimed to ½ of original size once construction complete
Reducing Environmental Impact: Water Transportation and Storage
Responsible Road Use

- **Goal:** Restore roads to “equal or better than” condition when traffic subsides. Maintain safe road conditions throughout drilling activity.

- **Options:**
  - Road Maintenance Agreement
  - Posting and Bonding Roads
Responsible Road Use

- Adhere to all traffic regulations
- Monitor the safe driving compliance of employees and contractors
- Schedule around school activities and community events whenever possible
- Work with public officials and emergency services to ensure safe and responsible use of roads
What To Expect
Active Drilling Site
Reclaimed Well Site
